Gutter Guards

Installed by "A Clear View"

678-878-8455

Gutter guards are installed on rain gutters to prevent leaves, twigs and other debris from clogging the downspouts. Obstructed downspouts will prevent rain run-off from flowing through the rain-carrying system and away from the foundation. Water that cannot run freely can back-up and overflow the gutter causing damage to the landscaping and the foundation below. If water leaks behind the gutter, damage to the roofline and the fascia is a possibility.

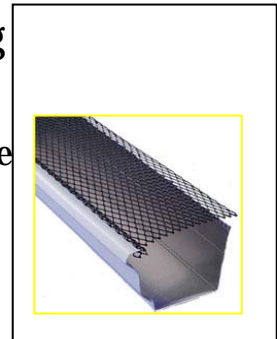

Problems caused by debris in gutters include:

- ❖ Damage to foundation.
- ❖ Damage to gutter system.
- ❖ Damage to saffit, fascia, and eaves.
- ❖ Mold in and around home.
- ❖ Mosquitoes breeding in gutter.

"A Clear View" installs all types of sectional gutter guards. Each home has different situations that determine what type of gutter guard will best fit. Call Rick and get the information you need to make an informed decision when choosing gutter guards.

\$2.50 Per Foot for Metal Lock-On Gutter Guard

- ◆ Black powder coated galvanized steel for long
- ◆ Low profile for better looks.
- ◆ Mesh screen allows for evaporation of standing water
- ◆ Handles high volume water flow.
- ◆ Will not buckle under ice or snow build-up.
- ◆ Very secure: unlike hinged gutter guards.
- ◆ Helps keep squirrels and birds out of attic and home.

Don't pay too much!

Many homes can be protected for less than \$600.00

Linear Feet	Cost Installed
150	\$375
200	\$500
